

VARIETY PLANTING GUIDE

Below are common bed configurations listed based upon center to center measurements.

To use the guide, follow these simple steps:

1. Identify the variety that you are growing
2. Locate your bed configuration
3. Identify the number of lines to plant per bed
4. Identify the space between plants in-line
5. Your total planting density per acre is listed in column four (4).

MAVERICK™ (20,000 plants/acre)			
CENTER TO CENTER (INCHES)	LINES PER BED	IN-LINE SPACING (INCHES)	PLANTING DENSITY (PLANTS/ACRE)
22	1	14	20,366
30	1	10	20,909
40	1	8	19,602
60	2	10	20,909
80	3	12	19,602

PIPELINE™ (26,000 plants/acre)			
CENTER TO CENTER (INCHES)	LINES PER BED	IN-LINE SPACING (INCHES)	PLANTING DENSITY (PLANTS/ACRE)
22	1	12	23,760
30	1	8	26,136
40	2	12	26,136
60	3	12	26,136
80	4	12	26,136
